PROJECTS

Project: Aspiration Architects

Description: Aspiration Architects is a full stack web application that is designed to help users build their own websites. This website allows users to create an HTML website that has CSS built inline. Technologies**:** React | Node | Express | MongoDB | JavaScript | CSS | Bcrypt | Mongoose | GitHub | Figma | Heroku | SweetAlert | React DnD | File-Saver | Bootstrap | Material UI
GitHub: https://github.com/KVance1010/website-builder
Live link: https://aspiration-architects.herokuapp.com/

Project: FP-4play

Description: 4Play is a full stack web application designed for users with a passion for video games. The website allows the user to create an account, check game information, create comments about games and search for games by game name, genre, and category. Technologies: JavaScript | CSS | Bcrypt | Sequelize | GitHub | Handlebars | Node | Sessions | Express | Figma | Heroku | jQuery | SweetAlert
GitHub: https://github.com/KVance1010/Gameproject
Live link: https://fp-4play.herokuapp.com

Project: Tech-Blog

Description: Tech-blog is a place where developers can write about tech topics. This is a full

stack web application that allows developers to create posts and make comments about other posts. Users can use CRUD operations on data that is stored on a database. Technologies: JavaScript | CSS | Bcrypt | Sequelize | GitHub | Handlebars | Node | Sessions | Express | Figma | Heroku
GitHub: https://github.com/KVance1010/Tech-Blog
Live link: https://tech-blog-101.herokuapp.com/

Project: OuiTravel

Description: OuiTravel serves as a travel guide for users. It provides many common research points such as currency conversion and common phrases. The webpage utilizes various APIs to aid the user in all of their travel needs. Technologies: JavaScript | CSS | HTML | GitHub | APIs
GitHub: https://github.com/KVance1010/travel-application
